

INDEPENDENT TABLETOP STUDIO / EST. 2025

BAD WIZARD GAMES

STORY FIRST. CONSEQUENCES IMMEDIATELY AFTER

THE STUDIO

Founded in 2025 by Jeffrey Young - a data scientist, AI engineer, machine learning engineer, and lifelong game enthusiast - Bad Wizard Games is an independent tabletop studio built around a simple belief: story is not decoration; it is the engine of play. The most memorable games create a world, put people inside it, and reveal how they react when the choices get strange. We create dark, satirical, and culturally observant games that turn social tension, flawed decisions, and sharp humor into shared experiences. Our work blends narrative design, systems thinking, and modern creative technology to produce games that are easy to enter, hard to predict, and even harder to stop talking about.
