

BAD WIZARD GAMES

STORY FIRST. CONSEQUENCES IMMEDIATELY AFTER.

THE STUDIO

Founded in 2023 by Jeffrey Young - a data scientist, AI engineer, machine learning engineer, and lifelong game enthusiast - Bad Wizard Games is an independent tabletop studio built around a simple belief: story is not decoration; it is the engine of play. The most memorable games create a world, put people inside it, and reveal how they react when the choices get strange. We create dark, satirical, and culturally observant games that turn social tension, flawed decisions, and sharp humor into shared experiences. Our work blends narrative design, systems thinking, and modern creative technology to produce games that are easy to enter, hard to predict, and even harder to stop talking about.

Development Pipeline

- ★ **Concept & Pillars**
Premise, player fantasy, one-page brief, and success criteria.
- ★ **Greybox Mechanics**
Card counts, dice math, action economy, and early prototype loops.
- ★ **Playtest Gauntlet**
Internal, blind, and community testing with structured iteration.
- ★ **Art Pass & UX**
Iconography, hierarchy, contrast, accessibility, and rule clarity.
- ★ **Production**
Quoting, proofs, bleed lines, PnP kits, logistics, and launch.
